

Water Service

Potable water is available to the entire property through Public Water Supply District No. 4 of Cass County, Missouri. Service has been available to specific portions of the property since 2007 through the main line pictured below. The main line is designed to meet fire flow requirements. It is likely that the main line will need to be relocated and additional main lines installed to accommodate the planned Harrisonville Water Basin and to provide service to the entire property. Legal agreements with Public Water Supply District No. 4 will be necessary to assure the District access to construct, maintain, and repair the required water lines.
